

Product specification

Telemetry terminal

Summary

VHF digital radio can provide data signal transmission. It has the characteristics of high transmission power, long transmission distance, integrated transmission, convenient installation, simple use, high performance price ratio, low error rate, stable reliability and so on. It is applied to remote data transmission system. It is suitable for urban transportation, industrial automation control, water conservancy project monitoring, hydrological monitoring and other fields.

Technical indicators

Working band: 230 MHz

Frequency tolerance: + 2.5ppm

Ambient temperature: -35 C ~+75 C

Data transmission rate: 1200/2400bps

DC voltage: 12V (+ 10%)

Wait for the current: less than 60mA

The emission current: less than 6 A (power 25W)
